

The Procedure of the Software Installation (pages 8 - 9)

During the installation of the Dimâge 2300 software, the message **“Please insert the disk labeled ‘Windows 98 CD-ROM’, and then click OK”** may appear.

If this message appears, change the procedure of the software installation. **Do not perform step 5 and step 6 in the Software Instruction Manual. Instead, do steps 5 - 8 below.**

Perform the install operations from step 1 to step 4 described on the software instruction manual pages 8 - 9.

5 Make sure that the checkbox is marked, then click on **‘Next >’**.

- Setup will begin and copying files will start. During the file copying, the following window will appear.

6 Remove the Dimâge 2300 CD-ROM from the CD-ROM drive, insert the Windows®98 CD-ROM instead, then click on **‘OK’**.

- After necessary files are copied, the following window will appear.

7 Remove the Windows®98 CD-ROM from the CD-ROM drive, re-insert the Dimâge 2300 CD-ROM, then click on **‘OK’**.

- Setup will go on. When copying files complete, the **Building of Driver Information Database** will start automatically.
- After the **Building Driver Information Database**, the following window will appear.

8 Check that **“Yes, I want to restart my computer now.”** is selected, remove any disks from their drives, then click on **‘Finish’**.

- The Setup program will complete and Windows® will be restarted.

Compatibility with the Microsoft® Windows®2000

9229-2769-24 P-A004

This version of the Dimâge 2300 software has NO compatibility with the Microsoft® Windows®2000.
